Overview

Models

HP IMC Wireless Services Manager Components Location Service Package E-LTU	JG142AAE

Key features

- Display Real-time location
- Replay User's History
- Set Location based Access Controls

Product overview

Real-time location Service allows the Wireless Service Manager module to collect Wifi signals to locate devices in real-time on the WLAN. Clients using the iNode client will be displayed in real-time, even as they move from one map to another. In addition, a replay can be created to track a user's historic path.
